

TESTIMONIALS

"I've collaborated with Bob for nearly two decades. I have found the Laws of Potential model to be intelligent, comprehensive and useful in emerging new insights and fundamental understandings about people, events and the mysteries of science and life. I often use Natural Thinking principles to comprehend complex social and economic issues, to deal more effectively with everyday problems, and to answer daunting questions about life purpose and meaning." —Steve Beller, Ph.D., Clinical Psychologist and President of National Health Data Systems, Inc. (NHDS)

"Dr. Bob's work in Life Science is impressive. The Laws of Potential's ability to bring about clarity and understanding, and then applying it to potential development, is exciting and profound." —Les Fehmi, Ph.D., Pioneer in the field of biofeedback, affiliate member of the Department of Medicine at Princeton University Medical Center

"As an advisor to my clients, I'll deal with stresses on a physical level, as a clinical nutritionist, on a biochemical level. The thing I find interesting about the Laws of Potential is that I'm able to actually deal with emotional issues, dealing directly with the system that Dr. Bob developed; the 13 natural intelligences. And quite often a person will say, 'why does the same thing keep happening to me', it's because they have this hidden belief system. Dr. Bob's model allows us to get into those hidden systems, those unconscious belief systems and uncover it. You can see immediate major changes take place with people which will manifest both on a physical, chemical, emotional, and spiritual level." —Dr. James Striano, D.C., Hudson Valley Chiropractic & Nutrition
