

TESTIMONIALS

"Sounds complicated but ends up Genius - Results!"

—Nick Marona, President, Progresso Soups, South America.

"I quit a comfortable career in academia and took my chances in corporate America. I eventually ended up as the number three man in the world at Equitable Life Corp. Many of the principles I utilized during my career, Dr. Flower has codified and validated in his discovery of the Laws of Potential and Natural Intelligence and Thinking. Had I the benefit of his counsel then, life would have been easier and more fun. Today I consult with Dr. Bob on any of my fiscal objectives." —Gary Billings, Ph.D., Retired corporate executive, author of "Self-Leadership," educator and consultant.

"He told me, "You can do this." I said, "I can't." He repeated himself -- so did I. Eventually, he prevailed and I ended up achieving significant levels of hidden potential. He is a true Entelechist, a master of developing peoples potential and reading situations. I now run one of our five auto dealerships, with over 60 employees, with the planning, organizing and functional skills that Dr. Bob's programs profess." —Sal Pepe, Successful Businessman, Owner and Manager of The Pepe Auto Group, Westchester County, NY.

"Dr. Bob's work in Life Science is impressive. The Laws of Potential's ability to bring about clarity and understanding, and then applying it to potential development, is exciting and profound." —Les Fehmi, Ph.D., Pioneer in the field of biofeedback, affiliate member of the Department of Medicine at Princeton University Medical Center.
